

Subject: Notice of temporary fuel surcharge

Dear business partner,

Due to the current and highly uncertain situation in the international energy markets, we are presently experiencing significant fluctuations and rising fuel prices. This development is partly linked to the geopolitical situation in the Middle East, where the conflict involving Israel, the United States, and Iran is impacting oil and energy markets globally.

The current situation has led to a substantial increase in our fuel-related costs – both in connection with our own vehicles and services, as well as external transport and service providers.

At this time, it is difficult to predict how long the market will continue to be affected by this uncertainty, and when prices will stabilize again at a more normal level.

In order to maintain our operations and continue delivering the service and quality our customers expect, we have therefore decided to temporarily manage the increased costs by introducing an increase in our treatment fee. In Zealand, this will result in a treatment fee increase of **5%**, and in Jutland there will be a treatment fee increase of **10%**.

In addition, you may experience price increases directly related to, or as a result of transport, as our logistics partners are forced to raise their prices due to the current market situation.

The adjustments described above will take effect from **1 April**. These adjustments are temporary and will be revised or phased out once the market situation stabilizes and normalizes.

We are monitoring market developments closely and will of course inform you as soon as the situation changes.

We hope for your understanding of this necessary adjustment during a period of extraordinary uncertainty in the energy markets. Should you have any questions, please feel free to contact us.

Kind regards

Charlotte Scott Larsen
