

SAFETY FIRST

GUIDELINES FOR VISITORS IN PRODUCTION AT RAGN-SELLS FACILITIES

SAFETY FIRST

Upon Arrival:

Upon arrival, please contact your designated contact person at Ragn-Sells to be assigned a parking space and to receive general safety information. The contact person will give you a tour of the premises and provide information about safety procedures and the assembly point in case of a fire.

Pedestrian Traffic:

Pedestrian traffic must always take place on the marked pedestrian areas, as there is significant vehicular transport on the premises. If there is a need to move outside the designated pedestrian areas, extra caution must be exercised.

Contact with Drivers:

To avoid unintended collisions, whenever there is a need to contact drivers, it is advisable to establish secure eye contact before approaching the vehicle.

Protective Equipment:

Due to the high volume of vehicular traffic on the premises, including both external and internal vehicles and machinery, it is mandatory to wear Class 2 safety vests and safety shoes whenever moving around the site.

Biological Agents:

At some of Ragn-Sells' facilities, work involves handling food waste. In these areas, there is a risk of exposure to bacteria, fungi, and viruses.

Therefore, designated protective equipment must be worn when working in these areas.

Smoking:

Smoking is only permitted in designated areas.

All smoking elsewhere is strictly prohibited.

Use of Mobile Phones:

We strongly discourage the use of your phone while moving around the premises. Please stand still and be aware of the traffic around you. Position yourself where the risk of collision is minimized.
